**DETAILED ACTION**

***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention: Group I contains claims 1-11 having a running method of placing wagers in a combined card game combined inclusively with gin rummy; Group 2 contains claims 12-20 having a running method of wagering in a combined card game; and Group 3 having wagering at the outset of a combined card game.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

As noted at the bottom of pg. 3 of paper No. 6, a provisional election was made without traverse to prosecute the invention of Group III, claim 21-27. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-26 have been withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3711

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Awada in view of Josephs.

Awada clearly anticipates all of claim 1 except in that he awards the player for a poker hand higher than that of the dealer. It is old to award a player for a poker holding according to a rank as defined on a pay table as taught by Josephs. To have awarded a players poker holding in the game of Awada according to a hierarchy of predetermined hands would have been an obvious matter of choice as being old in the art. Note further examples of paying for a poker holding according to a table is further taught by Palmer, Malek, Delaney and McBride.

In short, using a payout table to compare a predetermined hierarchy of winning poker hands to resolve the poker component of the game shown by Awada is not considered a patentable advance since such is an old and well known method of resolving poker wagers.

#### **Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Breeding shows a wagering game.
